

**THE INVISIBLE SOLUTION  
FOR A PERFECT SMILE**

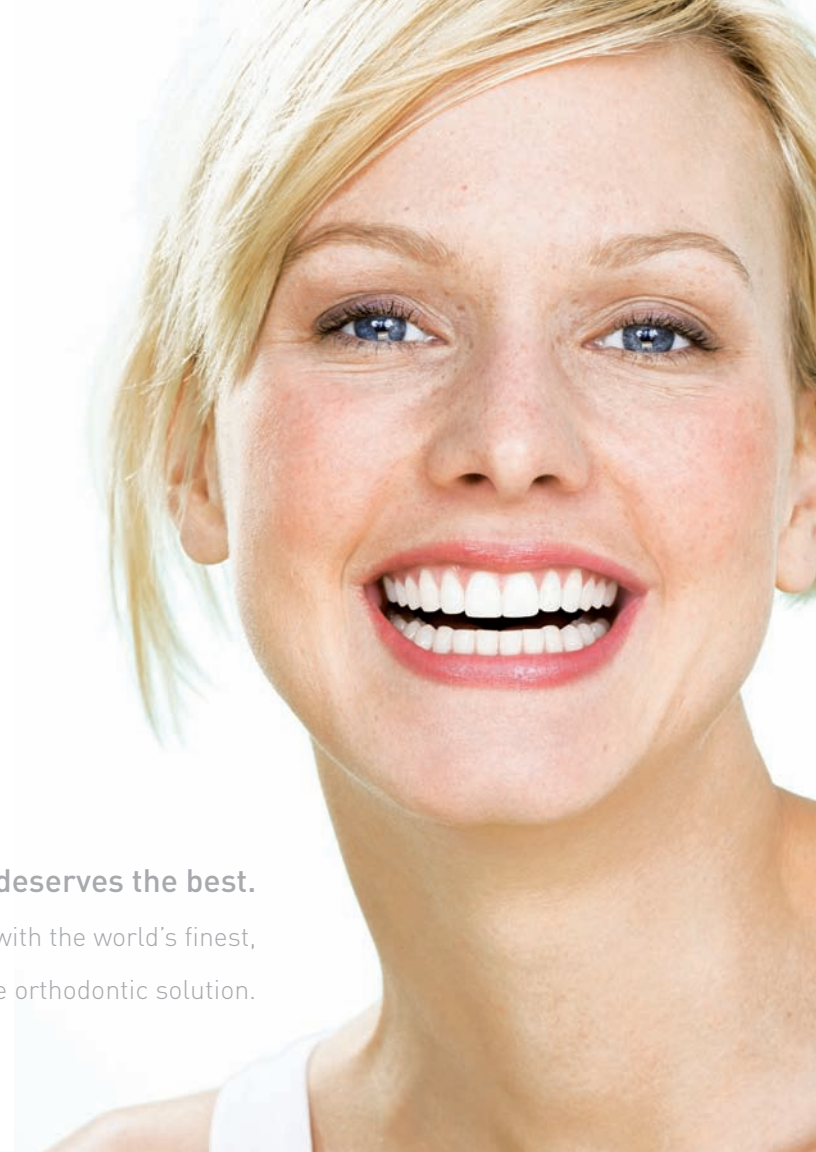

## IMAGINE

### The Confidence of a Perfect Smile

Introducing the **HARMONY** System, the world's most advanced digitally customized, invisible solution for straightening teeth. Using the latest in orthodontic technology, the **HARMONY** System attaches to the interior or lingual side of your teeth, so no one will know you are wearing braces but you.

**Your smile deserves the best.**

Make your smile the best it can be, with the world's finest, most advanced invisible orthodontic solution.

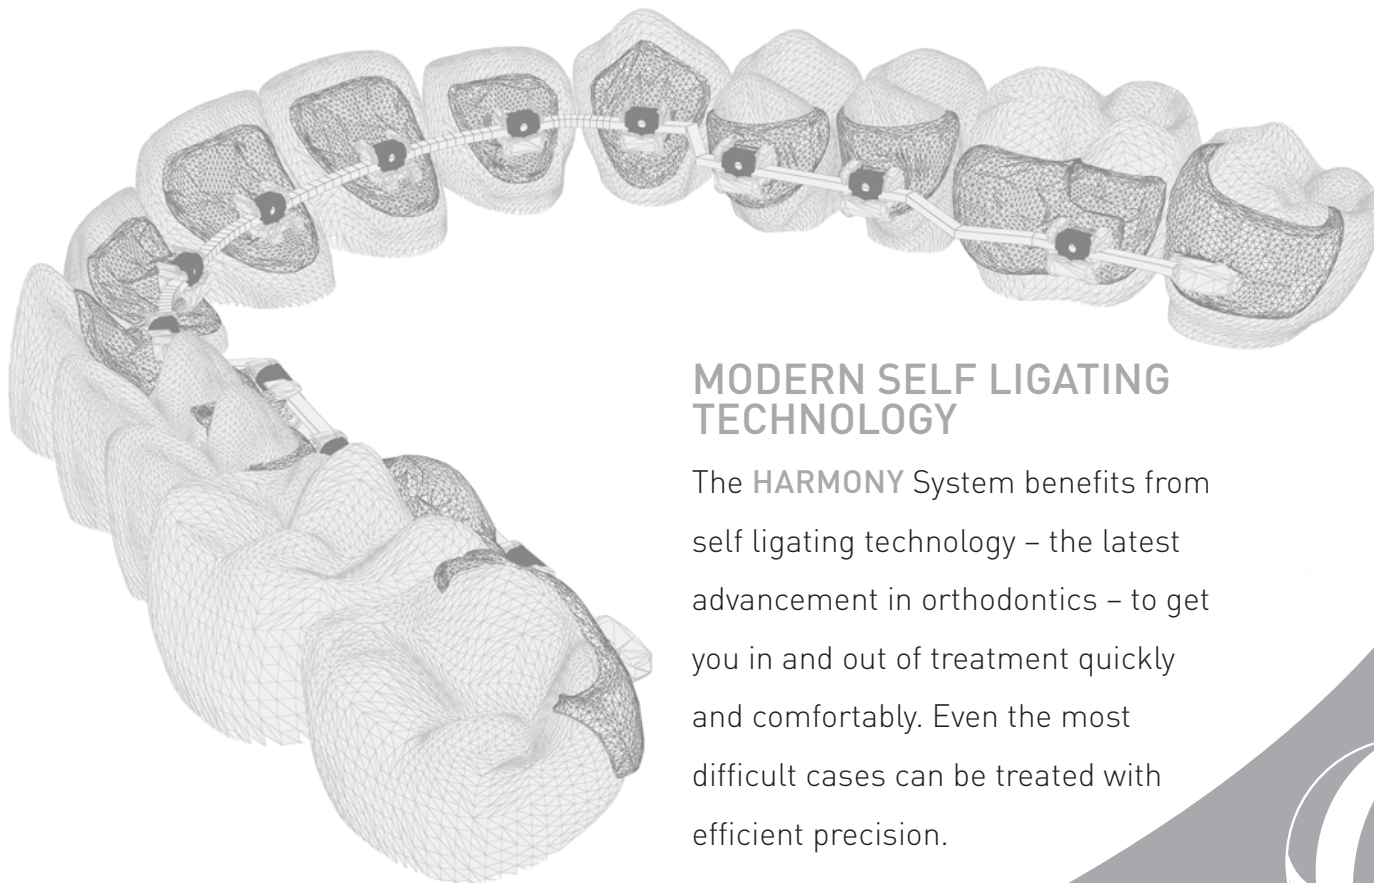

## A SOLUTION CREATED JUST FOR YOU

Your personal treatment plan is designed by your orthodontist, who utilizes **HARMONY**'s advanced technology in computer assisted treatment, resulting in a fully customized, invisible solution created exclusively for you.

Your new smile begins with a highly accurate 3D image of your teeth. Using proprietary technology, each tooth is moved to its ideal position, generating a digital simulation of your desired smile. From this simulation, advanced CAD/CAM technologies produce a customized system that adapts seamlessly to the shape and contour of your teeth.

Computer controlled, robotically formed arch wires are produced for each phase of your treatment – all resulting in the highest level of orthodontic precision and unparalleled accuracy in tooth correction – delivering the ultimate aesthetic solution just for you.

## MODERN SELF LIGATING TECHNOLOGY

The HARMONY System benefits from self ligating technology – the latest advancement in orthodontics – to get you in and out of treatment quickly and comfortably. Even the most difficult cases can be treated with efficient precision.

## FASTER TREATMENT

The efficiency and precision of the **HARMONY** System means your teeth move quickly and accurately to their ideal position, reducing the number of office visits and shortening overall treatment time.

## COMFORT

Engineered to be small and smooth, the **HARMONY** System adapts comfortably to your daily routine. Self ligating technology ensures that office visits are short, reducing time away from work or school.

## BETTER RESULTS

**HARMONY**'s combination of digital expertise and self ligating technology delivers better results than aligners and other aesthetic alternatives, offering you the ultimate solution for precise tooth alignment – all in a highly efficient, completely invisible system.

SHOW THE WORLD  
YOUR SMILE
